

Jews Admit National Socialists Were Satanists

In an article posted by the Haaretz, titled, Addressing the Satanic, Mystical Aspect of Nazism, they are admitting this very fact. That National Socialists were Satanists.

Many people like to call this "Paganism" but essentially that's only Satanism. Satanism is just a blanket term the jews have used on spiritual Pagans for centuries. We know better that this title doesn't come from them, but for us. In the same way they call "Demons" evil while it all means is Knowledgeable Ones; Satanists simply mean those who are practicing the Sanatana Dharma or essentially the spiritual path of truth.

"Satanic cults popular among SS officers demonstrate the importance of mystic faith in the worldview of the Nazi elite. Mainstream historians must pay more attention.", the author writes. The Article by Oded Heilbronner.

I will not pay 1 shekel to read the article. The title should be enough.

This article was not there before. Ironically it was from 2014, but the comments are from 2018. It wouldn't be unlikely it was resurfaced, or was not supposed to be posted, or taken down. How do people comment on a news article... 4 years later. Something's off.

Regardless of this...

Despite of the propaganda idiots who say Hitler and the National Socialists were...Christarded, these people are idiots. They could see through the jewish spiritual lie. Here you have some jews with three-digit IQ to admit the obvious facts.

The jews know what they are fighting against, maybe people should know too where their roots are and where the way is to spiritual salvation.
