Our brothers from Turkey and Bosnia Ex-Yu have done an extreme amount of work to help their people, and we can only congratulate them for that.

Proof of our translators and people who actually do CARE for our objectives, is people who do their part in advancing this world, both spiritually and materially. Empty words do not matter in front of actions. There are people who do laborious work for everything to exist. The more time progresses, the more we will see and readily understand the importance of all this work, which is all the more pressing.

These are the people who are Satan's messengers, and we are thankful for our Comrades who do Translations and provide the knowledge to our people who are sitting behind a language barrier, they do work of extreme importance, they deserve major thanks for that.

The Joy of Satan multilingual section will go through a bit of organization and overhaul. This is being currently worked and it's a lot of work. But it will eventually happen. This is because we will center activism efforts on top of these pages and on top of this material for more localized warfare. There is always endless work to do, but it's being done.

There are millions of Gentiles waiting a way out of the enemy's terrifying chains of suffering and ignorance, and we are going to provide this, no matter the cost.

Here you will find added both Bosnia Ex-Yu library section and Turkish:
